October 2009

I am pleased to support the State Board of Education's (SBOE's) recent approval of a revised *Texas State Plan for the Education of Gifted/Talented Students* (State Plan). The 2009 version of this document provides requirements for and guidance to districts as they meet the unique needs of an important special population in Texas.

The Texas Education Code (TEC) requires that the SBOE periodically update a state plan for the education of gifted/talented (G/T) students to guide school districts in establishing and improving services for identified students (TEC §29.123). The SBOE approved the updated language in September 2009. While the 2009 State Plan does not include any new requirements for districts, it does clarify requirements so that districts may more easily understand and meet them. It also makes use of new language and new recommendations which closely correspond to current research regarding best practices for G/T services.

One of the additions to the State Plan is the reference to and recommendation of the Texas Performance Standards Project (TPSP). First established through the General Appropriations Act of the 76th Texas Legislature, the TPSP is now established by TEC §39.236 (added by House Bill 3, 81st Texas Legislature) as the primary tool for assessing the effectiveness of gifted services. I am pleased to support the TPSP, the first assessment program of its kind *in the nation* for evaluation of G/T services.

Finally, as a result of the changes approved by the SBOE, the 2009 State Plan is fully aligned with the TEC requiring the responsibility for compliance monitoring of educational programs (TEC §7.028).

Through implementing the SBOE's newly-approved State Plan beginning in school year 2010-2011, Texas districts will be better equipped to provide a meaningful and fruitful educational experience for their G/T students.

FOREWORD

In 1977, the Texas Legislature passed its first legislation concerning the education of gifted/talented (G/T) students. In 1979, state funds for providing services to G/T children were made available, but providing such services was optional for school districts. In 1987, the Texas Legislature mandated that all school districts must identify and serve G/T students at all grade levels. In 1990, the *Texas State Plan for the Education of Gifted/Talented Students* (State Plan) was adopted by the Texas State Board of Education (SBOE) that included a commitment to high-level learning opportunities for G/T learners expressed in the following goal:

STATE GOAL FOR SERVICES FOR GIFTED/TALENTED STUDENTS

Students who participate in services designed for gifted/talented students will demonstrate skills in self-directed learning, thinking, research, and communication as evidenced by the development of innovative products and performances that reflect individuality and creativity and are advanced in relation to students of similar age, experience, or environment. High school graduates who have participated in services for gifted/talented students will have produced products and performances of professional quality as part of their program services.

In 1999, the 76th Texas Legislature introduced Rider 69 which spurred the initial development and ongoing refinement of the Texas Performance Standards Project for Gifted/Talented Students (TPSP) as a vehicle through which districts might address the stated goal. With the TPSP and ongoing research to inform and improve practice, Texas educators are committed to meeting the unique needs of G/T students and to expanding the ways to do so. To learn more about programs and resources for G/T education in Texas visit the Texas Education Agency (TEA) G/T website at

<http://www.tea.state.tx.us/index4.aspx?id=5158>, contact a local Texas public school district or regional education service center (ESC), or email TEA at gted@tea.state.tx.us.

Pursuant to Section 29.123 of the Texas Education Code (TEC), the State Plan forms the basis of G/T services and accountability. The plan offers an outline for services without prohibitive regulation. Districts are accountable for services as described in the “in compliance” column of the State Plan where performance measures are included for five aspects of G/T service design. These standards reflect actions required in state law and/or SBOE rule. Many districts, in collaboration with their communities, will provide more comprehensive services incorporating research-based best practices for G/T learners.

To offer some guidance to those districts and campuses, standards for “recommended” and “exemplary” performance are included in the plan and provide viable targets that local district educators seeking excellence, both for their district and for their students, may strive to attain. In all cases, those activities in the “recommended” column include and build on those actions described in the “in compliance” column. In turn, “exemplary” standards build on those that merit a “recommended” designation.

The TEA assists districts in providing comprehensive services to G/T learners in the following ways:

- Provides information on best practices, developments, and achievements in the field of G/T education to all interested parties
- Develops materials designed to assist districts in the development and implementation of model assessment procedures and services
- Facilitates partnerships among parents, institutions of higher education, communities, and school districts to design comprehensive G/T services
- Sponsors demonstration projects and develops materials that support the implementation of Advanced Placement and International Baccalaureate programs that are differentiated for the G/T students
- Collaborates with business and industry to provide additional opportunities for G/T students
- Monitors and implements any state and/or federal legislation designed to provide educational opportunities for G/T students

Through the combined efforts of the TEA, the Education Service Centers, local district personnel, colleges and universities, and the communities they serve, *all* children will experience an academically challenging education that enables them to maximize their potential.
